Fitzgerald Industries International is the premier provider of over 45,000 highly purified Monoclonal and Polyclonal Antibodies, purified Proteins, ELISA Kits and Specialty Research Products. For more than 20 years our customers have known that they can depend on Fitzgerald Industries to supply them with high quality products for research and further manufacture.

We recognize that cardiac research is at the pinnacle of modern day biological studies, with heart disease being such a huge problem across the globe. Our range of cardiac markers continues to grow, offering new products designed to advance your clinical research projects and aid in identification and treatment of acute cardiac conditions in a diagnostic environment. We aim to provide high quality tools to study existing and emerging targets to aid researchers in exploring causes and treatments for cardiac diseases. Our current brochure includes more than 500 cardiac markers spanning a vast array of targets.

In addition, we offer comprehensive listings in other research areas including Cell Biology, Immunology, Infectious Disease, Signal Transduction, Cancer, Cytokines & Growth Factors, Neuroscience, Hormones & Steroids, Protein Modification, Cell Death & Stress, and many more.
