Fitzgerald Industries International is the premier provider of over 45,000 highly purified Monoclonal and Polyclonal Antibodies, purified Proteins, ELISA Kits and Specialty Research Products. For more than 20 years our customers have known that they can depend on Fitzgerald Industries to supply them with high quality products for research and further manufacture.

Understanding cell biology is a fundamental part of all biological scientific research, governing the fields of cell and molecular biology, as well as to biomedical fields such as cancer research and developmental biology. Fitzgerald Industries works hard to forge the gaps in the tools available to researchers decipher cellular physiology, structure, the organelles they contain, interactions within their environment, their life cycle, division and death. Our current brochure encompasses over 2000 well characterized antibodies and proteins spanning each of these areas, providing the backbone to understanding a plethora of biochemical, genetic, developmental, and immunological areas in eukaryotic and prokaryotic life.

In addition, we offer comprehensive listings in other research areas including Cancer, Immunology, Infectious Disease, Signal Transduction, Neuroscience, Cytokines & Growth Factors, Cardiac Markers, Hormones & Steroids, Protein Modification, Cell Death & Stress, and many more.
